

Gyrostat Absolute Return Income Equity (Class A)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

Gyrostat Risk Managed Equity Fund – [Address uncertainty through portfolio construction - Volatility is our friend with an 11 year track record of returns increasing with market volatility \(including large market falls\).](#)

Solutions for: - Retiree equity income (absolute return benchmarks) and Australian and international equities (vs index) with protection [always](#) in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits.)

The flagship Gyrostat Absolute Return Income Equity Class A is designed for **capital protected retiree income**. Returns are designed to increase with market volatility and reliably increase in value on major market falls (downside tail always in place). It has a track record exceeding eleven years with no quarterly drawdown greater than a pre-defined 3% limit.

Market Commentary

MONTHLY UPDATE

Class A NAV at 31 May 2022 was \$0.8390.

The Australian market traded in a range of 5.7% during May (high 7364 on 5 May, low 6941 on 12 May). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets). During May the range was moderate.

Market volatility saw falls of -24.6% in May (as measured by the VIX and Australia-VIX). VIX high 34.8 on 9 May, low 26.2 on 31 May. The reduction in the pricing of risk reduces the valuation of protection.

Our outperformance during the month was driven by gains from BHP.

We anticipate strong investment performance during the September quarter (resource stocks dividend cycle.)

We continue our increased exposure to resource stocks and anticipate that the higher yields and volatility in this sector will generate returns consistent with our objectives. A more active asset allocation approach, particularly into higher yielding stocks in the upcoming dividend cycle has been adopted.

FUND OVERVIEW

Purpose: A highly defensive global non correlated income fund that reliably increases in value on large market falls (10 YR, max quarterly drawdown < 3%)

Investment Objectives:

Returns: 6% - 8% p.a. in trending markets, greater than 8% p.a. in volatile markets, BBSW3M + 3% p.a. in stable markets

Income: Minimum BBSW3M + 3% p.a. from dividends and risk management profits paid quarterly

Protection: No quarterly NAV draw-down exceeding 3%. Also includes a 'tail hedge' for gains on large market falls.

Distributions may be higher dependent on the performance of the Class

Class A buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty. The Class may borrow up to 30% of Class assets

Leverage is achieved through margin lending such that asset and debt liquidity are matched.

Note:

- Quarterly risk tolerance increased to 3% on 1 July 2018
- On 16 November 2020 until 21 December 2020 the ASX suffered a major outage to its ASX Trade system caused by a software issue identified following a system upgrade relating to the trading of combination orders creating inaccurate market data. This prevented the Fund capturing market upside as in previous market rallies over our 10 year track record, impacting returns in this report.
