

Gyrostat Risk Managed Australian Equity (Class C)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

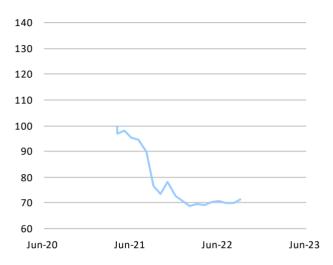

Gyrostat Risk Managed Equity Fund – Address uncertainty through portfolio construction - Volatility is our friend with a 11 year track record of returns increasing with market volatility (including large market falls).

Solutions for: - Retiree equity income (absolute return benchmarks) and Australian and international equities (vs index) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits).

The Gyrostat Risk Managed Australian Equity Class C is designed to outperform the Morningstar[®] Australia Index[™] over rolling 12 months by mitigating against large losses on major market falls (downside protection always in place.) An Australian equities allocation that 'spins out' the ASX200 State Street ETF with protection always with upside. The strategy builds on the class A track record over 11 years.

Market Commentary			
MONTHLY UPDATE	FUND OVERVIEW		
The Class C cum NAV at 30 Sep 2022 was \$0.5323, a \$0.0112 distribution was declared with ex NAV of \$0.5211. Total net asset value of the Fund was \$11,218,930.	Strategy: Designed outperform the Morningstar [®] Australia Index [™] over rolling 12 months whilst mitigating against major losses on large Australian market falls (downside protection always in place).		
	Purpose: A risk managed Australian ETE as part of the 'Australian equity'		

The Australian market traded in a range of 7.8% during Sep (high 7009 on 13 Sep, low 6462 on 28 Sep). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets). During Sep the range was wider with the ASX total return index which fell 6.31%

Market volatility saw rises of +41.6% in Sep (as measured by the VIX and Australia-VIX). VIX low 22.79 on 9 Sep, high 32.26 on 26 Sep. The increase in the pricing of risk increases the valuation of protection.

Our strong outperformance during the month was driven by the relatively wide market range, rising implied volatility increasing the value of protection, and stock specific exposure to BHP.

We anticipate strong investment performance to continue with volatility favorable to our 'dynamic hedging' risk management approach, and our increased exposure to BHP.

Purpose: A risk managed Australian ETF as part of the 'Australian equity component of a portfolio to de-risk portfolio structure.

Investment Objectives:

- Return: To exceed the benchmark index over rolling 12 months
- To match the benchmark index Income:
- Protection: Always in place to mitigate losses against large market falls to address sequencing risk

The strategy can be described as Risk Managed Australian Equities ETF, holding ASX200 State Street ETF, and component stocks with risk management overlay. Leverage can be up to 100% of class assets.

- It provides liquidity (ASX200 State Street ETF and XJO Australian index exchange traded options for risk management overlay)
- It provides a stable and reliable source of income (from dividends, franking credits, and risk management overlay)
- It provides an opportunity to address sequencing risk
