

Gyrostat Absolute Return Income Equity (Class A)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

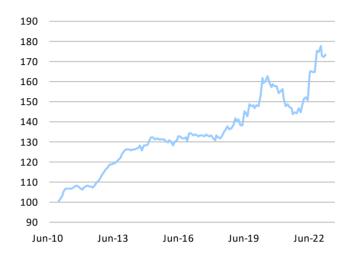

Gyrostat Risk Managed Equity Fund – Address uncertainty through portfolio construction - Volatility is our friend with an 12 year track record of returns increasing with market volatility (including large market falls).

Five Classes: - Regular equity income (absolute return benchmarks) and Australian and international equities (index return benchmarks) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits.)

The flagship Gyrostat Absolute Return Income Equity Class A is designed for retiree income with downside protection. Returns are designed to increase with market volatility and reliably increase in value on major market falls (downside tail always in place). It has a track record exceeding twelve years with no quarterly drawdown greater than a pre-defined 3% limit.

MONTHLY UPDATE

NAV per unit was \$0.6844. Total NAV of the Fund was \$12.7m.

The Australian market traded in a range of 4.41% during the month of Feb (7558 high on 3 Feb, 7224 low on 27 Feb). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets).

Market volatility rose in Feb by 15.83% (as measured by the VIX) and traded in a relatively narrow band. Month open VIX 1 Feb 17.87, high 22.87 on 21 Feb, month end 20.70 on 28 Feb. The strategy is designed to outperform the wider the volatility range.

Our performance during the month was driven by gains in FMG and QQQ offset by small losses in BHP and the XJO index.

We anticipate strong investment performance to continue with volatility favourable to our 'dynamic hedging' risk management approach and our increased exposure to resource stocks. We plan to maintain our exposure to commodity stocks into the March quarter, the next dividend cycle. A more active asset allocation approach, particularly into higher-yielding stocks, in the upcoming dividend cycle has been adopted.

For the 12 months to 28 Feb 2023, Class A achieved an absolute return of +14.71%.

FUND OVERVIEW

Strategy: Designed to increase in value on major Australian market falls (downside protection always in place) with regular income through the complete investment cycle. Low correlation to the Australian market.

Purpose: A highly defensive global non correlated income fund that reliably increases in value on large market falls (12 YR, max quarterly drawdown < 3%)

Investment Objectives:

| Return: | 6% - 8% p.a. in trending markets, > 8% p.a. in volatile markets, |
|---------|--|
| Income: | > BBSW3M + 3% p.a. from dividends and risk management profits paid quarterly. |

Protection: 3% quarterly downside risk tolerance with tail risk hedge for gains on large market falls.

Distributions may be higher dependent on the Class performance.

Class A buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty. The Class may borrow up to 30% of the Class assets

Leverage is achieved through margin lending such that asset and debt liquidity are matched.
