

Gyrostat Absolute Return Income Equity (Class A)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

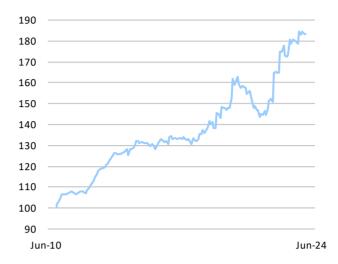

Gyrostat Risk Managed Equity Fund – <u>Address uncertainty through</u> portfolio construction - Lower beta with alpha for diversification <u>benefits</u> with a 13 year track record of returns increasing with market volatility (including large market falls).

5 classes: - Regular equity income (absolute return benchmarks) and Australian and international equities (index return benchmarks) with protection <u>always</u> in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversification benefits through low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits).

The flagship Gyrostat Absolute Return Income Equity Class A is designed for **capital growth and income whilst hedging equity market risk**. <u>Returns are designed to increase with market volatility</u> and increase in value on major market falls (downside tail always in place). Class A has a track record exceeding thirteen years with no quarterly drawdown greater than a pre-defined 3% limit.

Performance (Growth of AUD \$100,000)

* Returns are net of fees and include franking credits.

MONTHLY UPDATE

NAV per unit was \$0.6125. Total NAV of the Fund was \$13.7m.

The Australian market rallied in January and is at 52W highs. The price of risk has fallen significantly since October 2022 where the VIX has fallen from 32.02 to VIX 14.35 significantly reducing the cost of protection.

Our portfolio diversification benefits of lower risk, higher risk-adjusted returns, and reduced exposure to market shocks are more apparent in volatile markets (wider trading range, increasing cost of protection.) We have continued to perform strongly by taking advantage of differences in the price of risk across different time periods, and during the month took the opportunity to extend protection duration at or approaching historically low costs.

Gains from WDS were offset by losses in CBA, BHP and WBC resulting in modest losses for the month.

We anticipate strong investment performance to continue with volatility favorable to our 'dynamic hedging' risk management approach. We intend to increase our exposure to commodity stocks into the March quarter, the next dividend cycle. A more active asset allocation approach, particularly into higher yielding stocks, in the upcoming dividend cycle has been adopted.

CLASS OVERVIEW

Strategy: Risk managed with capital always protected to a 3% risk tolerance, regular income, and returns in rising and falling markets including in a market crash. Low correlation to the Australian market for diversification benefits.

Purpose: These returns are non correlated with the market providing portfolio diversification benefits such as lower risk, higher risk-adjusted returns, and reduced exposure to market shocks. A highly defensive non correlated income fund that is designed to increase in value on large market falls (12 YR, max quarterly drawdown < 3%)

Investment Objectives:

Return:	6% - 8% p.a. in trending markets, > 8% p.a. in volatile markets,
Income:	> BBSW3M + 3% p.a. from dividends and risk management profits paid quarterly.
Protection:	3% quarterly downside risk tolerance with tail risk hedge for gains on large market falls.

Distributions may be higher dependent on the Class performance.

Class A buys ASX-20 stocks with exchanged-traded options overlay to mitigate risk and may borrow up to 30% of the assets to achieve leverage through margin lending such that asset and debt liquidity are matched.
