Gyrostat Risk Managed Equity Fund

Address uncertainty through portfolio construction – diversified non and low correlated assets

Solutions for: [Equity income](#) (absolute return benchmark) and [Australian and international equities](#) (Vs index)

- 5 investment classes: Each class is designed to be added to balanced portfolios to reduce portfolio risk and increase income

Risk Managed Investing –

[Protection](#) always in place (dynamically hedged as per global best practice)

[Returns](#) designed to increase with market volatility:

[Income](#) paid quarterly from dividend pass through and dynamic hedging risk managed overlay

Competitive advantage: Risk managed investing - [dynamic hedging](#) - Volatility is our friend!

Gyrostat Risk Managed Equity Fund

Each class has a distinctive protection, returns, and income characteristics

DEFENSIVE (Benchmark: Absolute Return)			GROWTH (Benchmark: Index)		
Cash	Bonds	Fixed Interest Alternatives	Australian Equities	International Equities	Growth Alternatives
		Class A * Class B **	Class C ^ - Australia	Class E ^ - Global	Class D ^ - Hong Kong

* Absolute Return Income Equity Class A

** Leveraged Absolute Return Income Equity Class B

^ Risk Managed Indexes Class C, D, E

Class distinctive feature:

Class A: Returns increase on large market falls (downside tail always in place). Income cash rate + 3% pa (min)

Class B: Income cash rate + 6% pa (minimum) protect on large market falls

Class C,D,E: Protection mitigates losses on major market falls Vs class specific index

Gyrostat Risk Managed Equity Fund

The investment strategy and other key characteristics for each Class of Units are set out below:-

	Gyrostat Absolute Return Income Equity Class A	Gyrostat Leveraged Absolute Return Income Equity Class B	Gyrostat Risk Managed Australian Class C /Hong Kong Class D/Global Equity Class E
Returns objective	6% -8% in trending markets, greater than 8% in changing markets, BBSW 90 + 3% in stable markets	To exceed income distributions over rolling 12 months	Outperform class specific index over rolling 12 months
Income objective	Minimum BBSW 90 + 3%	Minimum BBSW 90 + 6%	To match the class specific index
Protection objective	No quarterly Net Asset Value draw-downs exceeding 3%; includes 'tail hedge' for gains on large market falls	No quarterly Net Asset Value draw-downs exceeding 6%	Protection always in place against major market falls
Benchmark	BBSW 90 + 3%	BBSW 90 + 3%	Morningstar® Australia Index™ Morningstar® Hong Kong Index™ Morningstar® Global Markets Index™
Leverage	The Class may borrow up to 30% of the Class Unit's assets	The Class may borrow up to 100% of the Class Unit's assets	The Class may borrow up to 100% of the Class Unit's assets
Distribution policy	Minimum BBSW90 + 3% pa Paid quarterly.	Minimum BBSW90 + 6% pa. Paid quarterly.	To match the class specific index Paid quarterly.
Class	Absolute Return Income Equity	Leveraged Absolute Return Income Equity	Risk Managed Equity - Holds underlying ETF with 'risk management option overlay
Classification	Highly Defensive – to enhance a fixed income portfolio	Equity Income – to enhance a fixed income portfolio	Australian/Hong Kong/International Equities

Gyrostat Risk Managed Equity Fund

Gyrostat Levered Absolute Return Income Equity (Class B)

Purpose:

A global non correlated income fund as part of the 'equity income' component of a portfolio to enhance income in a historically low interest rate environment

Investment Objectives:

Protection: No quarterly NAV draw-down exceeding 6%.

Returns: To exceed income distributions over rolling 12 months

Income: Minimum cash rate + 6% from dividends and risk management profits paid quarterly

Distributions may be higher dependent on the performance of the Class.

Class B buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty.

The Class may borrow up to 100% of Class assets

Class B is a levered version of Class A designed to deliver higher income than Class A with a higher risk tolerance. It seeks to generate equity income with downside protection always in place. In contrast to Class A it may not necessarily gain from major market falls.

The Class commenced operations on 13 April 2021.

Gyrostat Risk Managed Equity Fund

Why consider risk managed investing?

Our flagship class A has a track record exceeding 10 years with no quarterly drawdown greater than a pre-defined 3% limit and returns increasing with volatility

1 Feb 2020 to 31 March 2020: Gyrostat + 9.1% ASX200 - 26.8%

Portfolio construction can reduce undesirable volatility and large negative shocks through including diversified non correlated assets.

- Many portfolios are no longer diversified non correlated as a result of zero bound or negative interest rates
- Stock markets are 'late cycle' and expensive by most valuations metrics. Most corrections of >30%-50% occur within 6-12 months and typically within an 8 year cycle; we are now at year 13 which is the longest since 1929
- Historical drawdown losses with traditional balanced and diversified portfolios did not protect as well as expected

Diversification out of equities into the asset classes did not protect portfolios as well as expected

Gyrostat Risk Managed Equity Fund

Investment cycles – major sell offs a regular and hazardous part of the investment cycle

The graph shows the extent of falls from peak to trough, the duration of the fall, and time taken to recover to pre fall highs.

Most corrections occur within 8 years, now at year 14, longest on record is 14 years

S&P 500 Index - 90 Year Historical Chart: Peak to trough falls > 20%, duration of falls, time to recover to pre fall levels

Gyrostat Risk Managed Equity Fund

What is 'global best practice' for dynamic risk managed investing?

Five global papers reviewed - two key themes emerge:

- Structure protection between 'core' (normal market conditions moderate corrections) and 'tail' (extreme market corrections)
- Use dynamic downside protection, not buy and hold protection

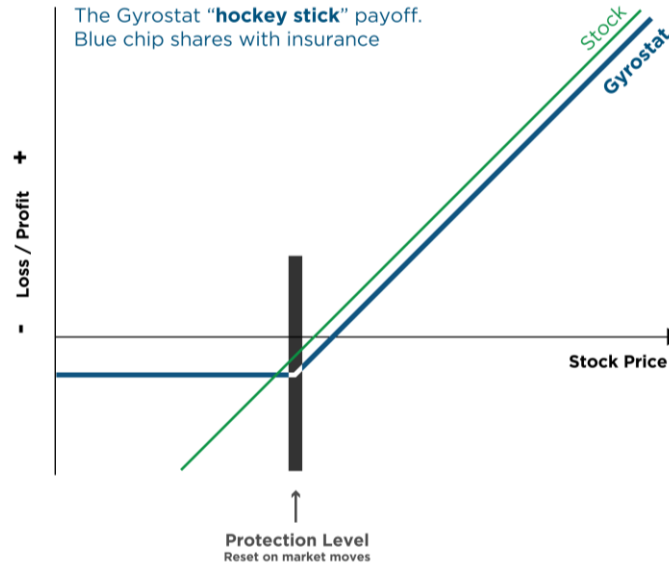

Gyrostat Risk Managed Equity Fund

Stock and core protection

Buy and hold blue chip shares with protection on the Australian Stock Exchange (and international exchanges).

Set amount of protection - to always participate in the upside with minimal capital at risk.

Reset the protection level on market moves for risk-return profile to match stock view - if the share price rises, increase protection level, on falls reduce protection level.

‘Global best practice’

Stock and core

Gyrostat Risk Managed Equity Fund

How we make money – Absolute Return and Leveraged Absolute Return units

Varying the investment recipe between ‘core’ and ‘tail’ protection to adjust risk-return payoff

Large falls

- Options extra protection sold
- ‘Conviction’ short at a defined cost with large upside

Range bound

- Option trading from re-setting protection levels
- Buy options ‘low’ and ‘sell’ high

Rising trend

- Stock price gains
- Re-set protection level high to ‘lock in’ gains

Stocks are ranked based on fundamental and technical analysis

Stock risk-return profile is re-set to match view

Gyrostat Risk Managed Equity Fund

Class B based on Class A investment approach and track record

Gyrostat Absolute Return Income Equity Class A:

- 10 year track record no quarterly downsides exceed -3% (predefined risk tolerance)
- Reliable income even if dividends are cut
- Returns increase with volatility (track record)

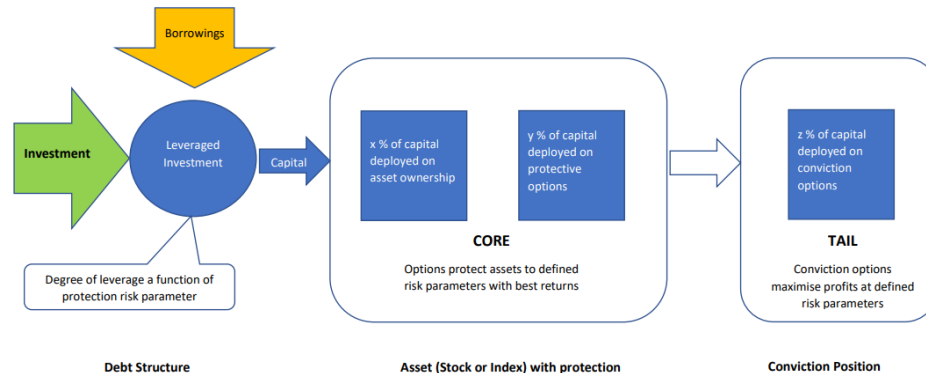

Proprietary systems identify volatility skews for lowest cost protection within defined risk parameter always in place

1 Feb 2020 to 31 March 2020: Gyrostat + 9.1% ASX200 - 26.8%

- * Tail hedge always in place for large gains on large market falls
- ** Funded by pass through of ASX20 dividends
- *** Hard risk parameter, no quarterly capital drawdowns exceed 3%

Class B: Increased leverage, less tail

Gyrostat Risk Managed Equity Fund

How do you address the traditional view that option based downside protection is expensive?

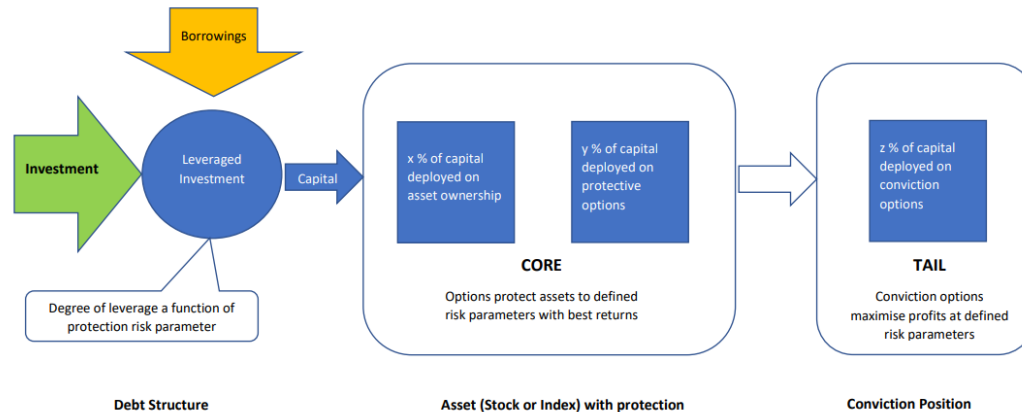

- Dynamic Downside Protection

“A dynamic option replication strategy provides investors with the ability to harvest greater upside potential whilst still providing an ongoing level of downside protection.” p.7

“Through a dynamic option replication strategy there is the ability to participate in a much larger part of the potential upside thus reducing the opportunity cost of implementing a downside protection strategy.” p.8

“Dynamic downside protection ... provide access to a payoff profile that has the potential to provide sufficient downside protection without removing too much upside potential.” p.19

Russell Research – Dynamic Downside Protection – March 2014 report

Gyrostat Risk Managed Equity Fund

Competitive advantage – dynamic hedging through proprietary systems

The Fund's distinctive feature is having downside protection, through options hedging, in place at all times.

“Cost effective” protection from:

- Identification of lowest cost alternative for a defined risk (implied volatility alpha)
- Adjust /Re-set risk-return payoffs with market moves (underlying stock/ETF and option markets) – “dynamic hedging”

Proprietary systems have:

- Detailed understanding of the current term structure and volatility smile of options market (enabled by technology - direct interface with the ASX and international exchange options market) – ability to adjust ‘options overlay’ depending upon current term structure and volatility smile of options
- Analyse the data in real time and combine stock with ASX (and international exchange) options to meet class investment objectives
- Strategies to implement throughout the investment cycle and changing conditions in the level of implied volatilities within the options market
 - Bought put options
 - Put option spreads
 - Collars (partial)
 - Bought and written call options
 - Put spread collars (partial)

Gyrostat Risk Managed Equity Fund

Target Market

- Dealer Groups, particularly those focused on pre and post retirees
- Lower and moderate risk 'model' portfolios –asset consultants and dealer groups
- Wholesale platform availability: Netwealth, Powerwrap, Mason Stevens
- Accounting practices with own AFSL
- Managed Discretionary Account advisers: through our MDA partner Harbourside
- Philanthropic investors: cash rebates directly to your designated charity
- SMSF: online investment without the need for any forms in most cases

The Fund is offered under Product Disclosure Statement dated 11 August 2021 to investors who qualify as 'Wholesale Clients'.

Gyrostat Risk Managed Equity Fund

To summarise

- Portfolio construction to address uncertainty and avoid regret
- Risk managed solutions for: [Equity income](#) (absolute return benchmark); and [Australian and international equities](#) (Vs index)
- Adapt to the changing 'late cycle' investment climate - highly indebted - historic low interest rates - heightened geopolitical uncertainty

"You've spent so much time putting it all together – what's the point if it is going to fall apart on major market falls.

"You can do *nothing*, or you can do *something*" – Ben Feldman

Key Personnel

The senior management team of Gyrostat Capital has extensive experience domestically and globally, as investors, as non-executive directors, and as senior management in funds management, private equity, industry, investment banking, and equity research.

Craig Racine- Managing Director, Chief Investment Officer

BCom, LLB, MAppFin, PGDip (Int Fin)
