

# GYROSTAT

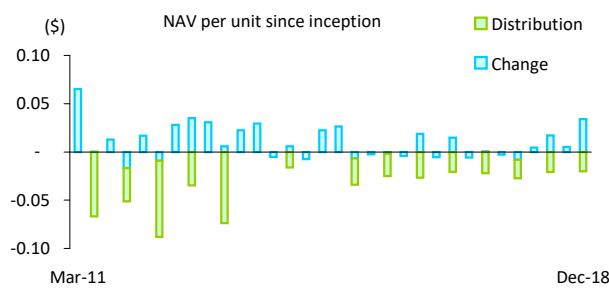

RISK MANAGED EQUITY FUNDS

- Investors – Pre and post retirees (sequencing risk), industry associations, intergenerational wealth transfer
- Absolute return alternative – stable and rising returns with regular income
- Distinctive risk management – protection always in place with upside
- Making money when others don't – capital growth in trending and volatile markets (including down markets)
- Complements short term bonds in a portfolio
- Proven strategy over 8 years

## Expected returns - Investment cycle

## Distribution Policy

After Gyrostat received its AFSL in July 2014, the Board adopted a formal distribution policy. Prior to this time the policy was designed to meet the specific cash flow requirements of a select group of investors. Minimum distribution is based on the 90 day bank bill swap rate (BBSW90) + 3% p.a., paid semi annually. This is currently at 5.0% p.a. Dependant upon the performance of the Fund, the Board will pay out higher than minimum distribution.

BBSW90 is to be determined at the commencement of the quarter prior to the payment of the distribution. The net income of the fund is its dividends (cash and franking credits) from shares less its expenses and cost of protection.

Investment funds are fully invested through the investment cycle. We pass through dividends and franking credits.

Performance	Gyrostat total return	BBSW 90 total return	* total return is compound annual growth rate as defined by Financial Services Council	
1 month	0.6%	0.2%		
3 months	2.2%	0.5%		
1 Year	5.8%	2.0%		
3 Years	3.2%	1.9%		
5 Years	2.2%	2.2%		
Inception	4.2%	2.8%
