

Gyrostat Leveraged Absolute Return Income Equity (Class B)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

Gyrostat Risk Managed Equity Fund – Address uncertainty through portfolio construction - Volatility is our friend with a 10 year track record of returns increasing with market volatility (including large market falls).

Solutions for: - Retiree equity income (absolute return benchmarks) and Australian and international equities (vs index) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits.)

The Gyrostat Leveraged Absolute Return Income Equity Class B is designed to generate equity income of at least BBSW + 6% (paid quarterly) with no quarterly draw-downs to exceed a pre-defined 6% limit. The strategy builds on the class A track record exceeding eleven years with no quarterly drawdown greater than a pre-defined 3% limit.

Market Commentary

MONTHLY UPDATE

Class B NAV at 31 December 2021 was \$0.8148, a distribution was declared of \$0.0138 with post distribution NAV of \$0.8010. The Class commenced operations on 13 April 2021.

The Australian market traded in a range of +4.0% during December (high 7513 on 30 December, low 7225 on 2 December). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets).

Market volatility saw significant declines in December (as measured by the VIX and Australia-VIX). VIX high 31.1 on 1 December, low 16.9 on 29 December. This was a major contributor to monthly losses.

During December the cost of protection of BHP and FMG fell significantly with falling levels of implied volatility. Whilst over the month this resulted in losses, it enabled protection duration to be significantly extended and during 2022 is expected to result in lower protection costs and benefits from any volatility.

Investment operations have been refined to give additional focus on enhancing income generation over the 3 year recommended investment timeframe. Positions in FMG and BHP are well positioned for NAV uplift into dividend capture in February and March. We anticipate that the higher yields and volatility in this sector will generate returns consistent with our objectives. A more active asset allocation approach, particularly into higher yielding stocks in the upcoming dividend cycle has been adopted.

FUND OVERVIEW

Purpose: A global non correlated income fund as part of the 'equity income' component of a portfolio to enhance income in a historically low interest rate environment

Investment Objectives:

Returns: To exceed income distributions over rolling 12 months

Income: Minimum BBSW3M + 6% p.a. from dividends and risk management profits paid quarterly

Protection: No quarterly NAV draw-down exceeding 6%.

Distributions may be higher dependent on the performance of the Class.

Class B buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty. The Class may borrow up to 100% of Class assets

Class B is a levered version of Class A designed to deliver higher income than Class A with a higher risk tolerance. It seeks to generate equity income with downside protection always in place. In contrast to Class A it may not necessarily gain from major market falls.

Our expectation is that over the cycle we will achieve our income and return objectives whilst continuing to operate with our 'hard' pre-defined risk parameters.
