

Gyrostat Leveraged Absolute Return Income Equity (Class B)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

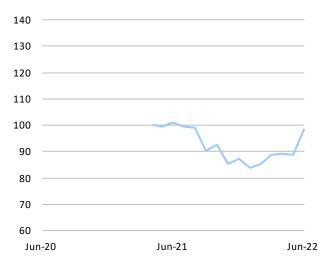

Gyrostat Risk Managed Equity Fund – Address uncertainty through portfolio construction - Volatility is our friend with an 11 year track record of returns increasing with market volatility (including large market falls).

Solutions for: - Retiree equity income (absolute return benchmarks) and Australian and international equities (vs index) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits.)

The Gyrostat Leveraged Absolute Return Income Equity Class B is designed for capital protected retiree income to generate equity income of at least BBSW + 6% (paid quarterly) with no quarterly draw-downs to exceed a pre-defined 6% limit. The strategy builds on the class A track record exceeding eleven years of returns increasing with market volatility.

Market Commentary

MONTHLY UPDATE

FUND OVERVIEW

Class B NAV at 31 May 2022 was \$0.9286. The Class commenced operations on 13 April 2021.

The Australian market traded in a range of 5.7% during May (high 7364 on 5 May, low 6941 on 12 May). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets). During May the range was moderate.

Market volatility saw falls of -24.6% in May (as measured by the VIX and Australia-VIX). VIX high 34.8 on 9 May, low 26.2 on 31 May. The reduction in the pricing of risk reduces the valuation of protection.

Our outperformance during the month was driven by gains from BHP.

We anticipate strong investment performance during the September quarter (resource stocks dividend cycle.)

We continue our increased exposure to resource stocks and anticipate that the higher yields and volatility in this sector will generate returns consistent with our objectives. A more active asset allocation approach, particularly into higher yielding stocks in the upcoming dividend cycle has been adopted. **Purpose:** A global non correlated income fund as part of the 'equity income' component of a portfolio to enhance income in a historically low interest rate environment

Investment Objectives:

Returns: To exceed income distributions over rolling 12 months Income: Minimum BBSW3M + 6% p.a. from dividends and risk management profits paid quarterly Protection: No quarterly NAV draw-down exceeding 6%.

Distributions may be higher dependent on the performance of the Class.

Class B buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty. The Class may borrow up to 100% of Class assets

Class B is a levered version of Class A designed to deliver higher income than Class A with a higher risk tolerance. It seeks to generate equity income with downside protection always in place. In contrast to Class A it may not necessarily gain from major market falls.

Our expectation is that <u>over the cycle</u> we will achieve our income and return objectives whilst continuing to operate with our 'hard' pre-defined risk parameters.
