

Gyrostat Leveraged Absolute Return Income Equity (Class B)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

Gyrostat Risk Managed Equity Fund – Address uncertainty through portfolio construction - Volatility is our friend with an 11 year track record of returns increasing with market volatility (including large market falls).

Five Classes: - Regular equity income (absolute return benchmarks) and Australian and international equities (index return benchmarks) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversified low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits.)

Gyrostat Leveraged Absolute Return Income Equity Class B is designed for **retiree income with downside protection** to generate equity income of at least BBSW + 6% (paid quarterly) with no quarterly draw-downs to exceed a pre-defined 6% limit. The strategy builds on the class A track record over 11 years of returns increasing with market volatility.

Market Commentary

MONTHLY UPDATE

Class B cum NAV at 30 Sep 2022 was \$0.7465, a \$0.0140 distribution was declared with ex NAV of \$0.7325. Total net asset value of the Fund was \$11,218,930.

The Australian market traded in a range of 7.8% during Sep (high 7009 on 13 Sep, low 6462 on 28 Sep). Our investment strategy is designed for returns to increase the larger the market range (in either trending, falling, or rising markets). During Sep the range was wider with the ASX total return index which fell 6.31%.

Market volatility saw rises of +41.6% in Sep (as measured by the VIX and Australia-VIX). VIX low 22.79 on 9 Sep, high 32.26 on 26 Sep. The increase in the pricing of risk increases the valuation of protection.

Our strong performance during the month was driven by our key commodity stock holdings in BHP, FMG, WDS, and RIO.

We anticipate strong investment performance to continue with volatility favorable to our 'dynamic hedging' risk management approach, and our increased exposure to resource stocks. We anticipate increasing exposure to bank stocks during the Dec quarter in their upcoming dividend cycle. A more active asset allocation approach, particularly into higher yielding stocks in the upcoming dividend cycle has been adopted.

FUND OVERVIEW

Strategy: Designed to produce higher income (compared to an investment in the Class A Units) through the complete investment cycle (downside protection always in place). In contrast to the Class A Units, Class B Units may not necessarily gain from major market falls. Low correlation to the Australian market.

Purpose: A global non correlated income fund as part of the 'equity income' component of a portfolio to enhance income in a historically low interest rate environment

Investment Objectives:

Return: To exceed income distributions over rolling 12 months.

Income: > BBSW3M + 6% p.a. from dividends and risk management profits paid quarterly.

Protection: 6% quarterly downside risk tolerance.

Distributions may be higher dependent on the Class performance.

Class B buys and holds ASX-20 and International listed equities and options with the relevant exchange as the derivative counterparty. The Class may borrow up to 100% of the Class assets.

Class B is a levered version of Class A to deliver higher income and higher risk tolerance than Class A. Our expectation is that over the cycle we will achieve our income and return objectives while operate with our pre-defined risk parameters.
