

Gyrostat Absolute Return Income Equity (Class A)

Gyrostat Risk Managed Equity Fund ARSN 651 853 799

Gyrostat Risk Managed Equity Fund – [Address uncertainty through portfolio construction - Lower beta with alpha for diversification benefits](#) with a 13 year track record of returns increasing with market volatility (including large market falls).

5 classes: - Regular equity income (absolute return benchmarks) and Australian and international equities (index return benchmarks) with protection always in place against major market falls (sequencing).

Headquartered in Melbourne, Australia, Gyrostat are specialists in delivering diversification benefits through low and non correlated investment solutions which address sequencing and portfolio drawdown risk while delivering equity income (derived from dividend pass through and risk management overlay profits).

The flagship Gyrostat Absolute Return Income Equity Class A is designed for **capital growth and income whilst hedging equity market risk**. Returns are designed to increase with market volatility and increase in value on major market falls (downside tail always in place). Class A has a track record exceeding thirteen years with no quarterly drawdown greater than a pre-defined 3% limit.

Performance (Growth of AUD \$100,000)

Net Investment Performance %								
	1M	3M	6M	1YR	2YR (PA)	3YR (PA)	5YR (PA)	SI (PA)
GRMEF Class A	-0.87	0.87	4.09	5.81	7.46	9.06	5.90	4.82
BBSW3M + 3%	0.63	1.85	3.71	7.53	6.92	5.69	4.79	5.42
Excess Returns	-1.50	-0.98	0.38	-1.72	0.54	3.37	1.11	-0.60

* Returns are net of fees and include franking credits.

MONTHLY UPDATE	CLASS OVERVIEW
<p>NAV per unit was \$0.5689. Total NAV of the Fund was \$13.4m.</p> <p>The Australian market traded higher in July and remains near 52W and all-time highs. The price of risk has fallen significantly since October 2022 level of 32.02, reducing the cost of protection. During July the price of risk and protection increased from 12.22 to 16.36.</p> <p>Our portfolio diversification benefits of lower risk, higher risk-adjusted returns, and reduced exposure to market shocks are more apparent in volatile markets (wider trading range, increasing cost of protection).</p> <p>With our approach we do not need to engage in debates about market direction, it is the differing market predictions and general uncertainty that generate our returns, as these causes changes in stock prices and the price of risk.</p> <p>Losses from FMG, XJO, and WDS offset modest gains from NAB and WBC delivering modest losses for the month.</p> <p>We anticipate strong investment performance to continue with volatility favorable to our 'dynamic hedging' risk management approach. A more active asset allocation approach, particularly into higher yielding stocks, in the upcoming dividend cycle has been adopted. The next dividend cycle is in commodity stocks in Aug/Sep.</p>	<p>Strategy: Risk managed with capital always protected to a 3% risk tolerance, regular income, and returns in rising and falling markets including in a market crash. Low correlation to the Australian market for diversification benefits.</p> <p>Purpose: These returns are non correlated with the market providing portfolio diversification benefits such as lower risk, higher risk-adjusted returns, and reduced exposure to market shocks. A highly defensive non correlated income fund that is designed to increase in value on large market falls (12 YR, max quarterly drawdown < 3%)</p> <p>Investment Objectives:</p> <p>Return: 6% - 8% p.a. in trending markets, > 8% p.a. in volatile markets,</p> <p>Income: > BBSW3M + 3% p.a. from dividends and risk management profits paid quarterly.</p> <p>Protection: 3% quarterly downside risk tolerance with tail risk hedge for gains on large market falls.</p> <p>Distributions may be higher dependent on the Class performance.</p> <p>Class A buys ASX-20 stocks with exchanged-traded options overlay to mitigate risk and may borrow up to 30% of the assets to achieve leverage through margin lending such that asset and debt liquidity are matched.</p>
