Gyrostat Absolute Return Income Equity Fund

Performance since inception

Buy and hold ASX20 shares with lowest cost 'hard' protection **always** in place with upside

- Returns:** Compounded returns 49 % since inception; designed to increase with volatility; includes a 'tail hedge' for gains on large market falls

- Income:** Minimum BBSW 90 + 3% (currently 4.2% pa) from pass through of dividends

- Protection:** 35 consecutive quarters operated within 'hard' risk parameter with no quarterly NAV drawdown exceed 3%; maximum capital draw-down – 2.2%

Gyrostat Absolute Return Income Equity Fund

Investment Objectives

'Alternative – defensive' asset allocation- combines returns, income and protection at 'hard' 3% always in place

Returns are designed to increase with market volatility – increase conservative asset returns and income

RETURNS

6%-8% in trending markets, greater than 8% in changing markets, BBSW90 + 3% in stable markets.

INCOME

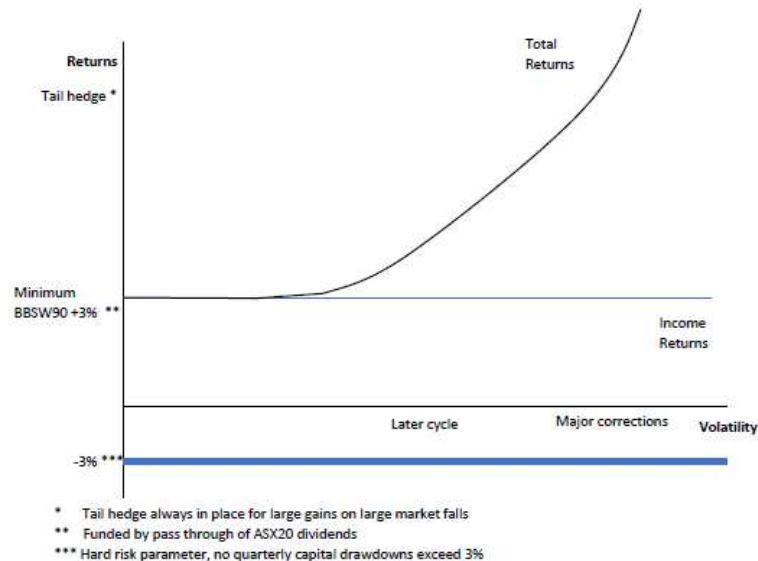

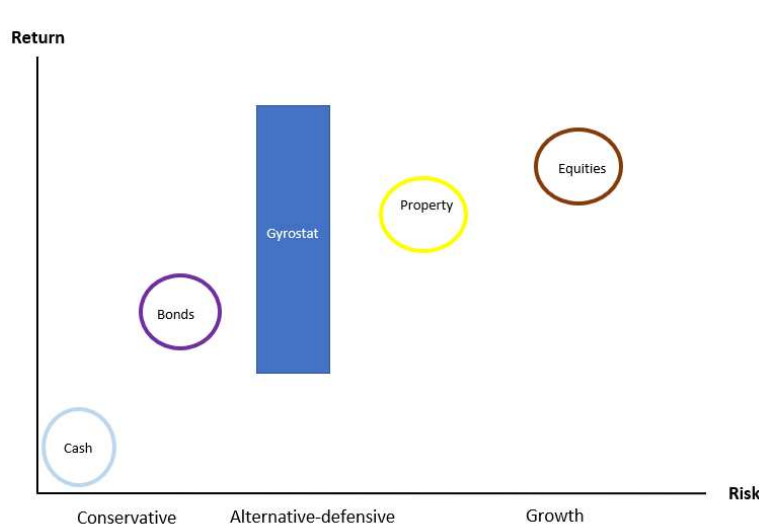

Minimum cash rate + 3% paid semi-annually (currently 4.2% p.a.) from dividends and franking credits.

PROTECTION

No quarterly NAV draw-downs exceeding 3% (max capital drawdown -2.2% in any circumstances.)

With the evolution of our investment processes and raising the 'hard' quarterly risk tolerance from 2% to 3% (in February 2019) we **upgrade our returns guidance** in stable markets to the 90 day bank bill swap rate ("BBSW 90"+ 3%). We anticipate returns in all market environments be at least BBSW 90 + 3% (enabling investors to receive income and capital growth.)

“Alternative – defensive” investment characteristics for “late cycle” asset allocation

- ‘Late cycle’ asset allocations to “alternatives - defensive” (~ 7 pc – 8.8 pc) can increase portfolio returns and reduces risk
- 9 year track record of delivering investment objectives - returns increasing with volatility levels, no quarterly capital draw-downs exceeding 3 pc (**maximum capital draw-down – 2.2% in any circumstances**)
- Easy to understand investment - buy and hold ASX 20 stocks with lowest cost protection always in place to hard 3 pc risk tolerance.

Growth, capital secure, capital stable, balance allocations late cycle (higher returns than cash/ fixed interest) particularly in more volatile markets (now and next 5 years; also tail hedge for large gains on big market falls.)

“Alternative – defensive” solutions

We offer a solution to investors for the following issues:-

- 1) Sequencing risk: Move from unprotected growth asset to Gyrostat (usual retirement tactical re-balance to conservative asset, with higher income, higher returns and downside tail for gains on large market falls.) Other risk management approaches without ‘hard’ protection always in place have a much higher maximum NAV capital draw-down during the complete investment cycle.
- 2) Falling interest rates (conservative assets insufficient returns and income): Move from cash/short term bonds to Gyrostat, with ‘hard’ protection always in place to offer capital stability.

Suitable investors:

- Equity income in retirement: re-allocation to conservative assets from growth through investors life cycle
- Comprehensive Income in Retirement (CIPR)
- Family offices: directly into Fund and/or ‘investment risk overlay’
- Philanthropic investors: direct cash distributions to designated charity whilst controlling your capital investment
- Significant Investment Visa (SIV), Premium Investment Visa (PIV)

“Alternative – defensive” investment characteristics for “late cycle” asset allocation

"McGregor Asset Consulting has developed a solid level of confidence in the manager's ability to successfully execute on their investment strategy. They have a long history, spanning more than 8 years, and have performed as expected during the various market conditions, in particular volatile markets, where the Fund has protected capital and delivered solid absolute returns. This is the environment where the Fund is expected to perform, and has been the case, providing diversification benefits to long-only equity funds."

Our specialist expertise – risk managed investing

To have **protection always in place** to maximise returns for a 'hard' defined risk parameter.

To minimise costs:

- Proprietary software identifies options series with great profit potential for a defined cost, exploiting differing levels of implied volatility in the options markets
- “Active management” by buying or selling options with market movements

Applying established approaches to investment risk management

To our knowledge, the Gyrostat approach is not yet available from any other Fund in the Australian market.

In the USA the approach has been successfully applied for nearly 20 years.

3 leading investment banks have adopted similar strategies for their clients in global markets:

“Dynamic downside protection or option replication strategies provide access to a pay-off profile that has the potential to provide sufficient downside protection without removing too much upside potential.”

https://russellinvestments.com/-/media/files/au/campaigns/cps/r_rpt_res_protection_v1ff_1402.pdf?la=en-au

“Put options are often the first defense that comes to mind for investors. These are an explicit insurance contract, guaranteeing protection if market prices fall below the strike price.”

<https://www.ssga.com/na/us/institutional-investor/en/our-insights/publications/as-the-cycle-lengthens-investors-look-to-hedge-tail-risk-but-at-what-price.html>

“In a bear market or a painful correction, astute investors in these mutual funds will find a refuge from the storm and a greater chance of substantial profits.”

Gyrostat Absolute Return Income Equity Fund

Protection always in place with upside

Buy and hold blue chip shares with protection on the Australian Stock Exchange.

Set amount of protection - to always participate in the upside with minimal capital at risk.

Reset the protection level on market moves for risk-return profile to match stock view - if the share price rises, increase protection level, on falls reduce protection level.

Our maximum quarterly NAV drawdown is 3% since our inception in December 2010

Gyrostat Absolute Return Income Equity Fund

How we make money

Stocks are ranked based on fundamental and technical analysis
Stock risk-return profile is re-set to match view

Large falls

- Options extra protection sold
- 'Conviction' short at a defined cost with large upside

Range bound

- Option trading from re-setting protection levels
- Buy options 'low' and 'sell' high

Rising trend

- Stock price gains
- Re-set protection level high to 'lock in' gains

Gyrostat Absolute Return Income Equity Fund

Key features

The key investment risk management features are:

- Protection is always in place to a specified 'hard' risk parameter
- Lower protection costs than existing approaches through option series selection and actively managing the options with market moves (enabled by technological advances and deregulation)
- A financially strong counter-party - the ASX - for hedging activities
- Transparent mark to market valuations from ASX valuations
- A net buyer of protection with no debt in the fund
- Highly scalable solution

'Tail hedge' always in place 'late cycle' for gains on large market falls

The graph shows the extent of falls from peak to trough, the duration of the fall, and time taken to recover to pre fall highs.

Most corrections occur within 8 years, now at year 12, longest on record is 13 years

**S&P 500 Index - 90 Year
Historical Chart: Peak to trough
falls > 20%, duration of falls,
time to recover to pre fall levels**

Source:

<http://www.macrotrends.net/2324/sp-500-historical-chart-data>

Markets volatility cycles – ‘stable’ to ‘volatile’ each 5 years (approx)

‘Late cycle’ market conditions- uncertainty: geopolitical, liquidity changes with Central Banks adjusting QE policies and interest rates, macro economic indicators and changes in company earnings expectations.

“Alternative – defensive” investment characteristics for “late cycle” asset allocation

"To our knowledge, there are no other **conservative funds** available in Australia/Asia with ‘hard’ protection always in place and a 9 year track record of no quarterly NAV draw-downs exceeding 3%, regular equity income, and demonstrated returns increasing with volatility levels. (with tail hedge in place for large gains on large market falls)."

McGregor Asset Consulting

Key Personnel

The senior management team of Gyrostat Capital has extensive experience domestically and globally, as investors, as non-executive directors, and as senior management in funds management, private equity, industry, investment banking, corporate law and equity research.

Craig Racine- Managing Director, Chief Investment Officer
BCom, LLB, MAppFin, PGDip (Int Fin)
